

## Safety at Roma

At Roma we are dedicated to protecting all our employees and the public by being proactive towards health and safety, taking preventative measures, quick response to resolve action items, communication, risk management, training, compliance and ongoing monitoring to name a few.

A direct message from the President mentioned at company events and safety meetings is that “all employees work in a safe manner and go home to their families as they came to work”. This message is echoed through the workforce and is evident through site observations on ongoing projects.

Roma’s success in achieving COR is evidence that the Health and Safety Management System of the company is efficient and effective. Management’s full support and dedication to achieving COR displays their commitment to the health and safety of the workforce. COR validates to our clients that we have a Health and Safety Management System that is established, effective, and audited yearly by internal and external audits.

Beyond COR a great deal goes into the preparation of projects to ensure public safety. Coordination and communication with the relevant services such as the Fire Department, TSSA, and Emergency Services, are vital to ensure compliance with life safety systems for the public. The safety and well-being of our team members, trades, subcontractors, and the public is a top priority.
